Operations Intelligence Report

Occupancy-driven model - change occupancy, staffing and the scorecard follow

Whitefield Commons

Lakeshore Senior Living Group - Ada, Michigan
Type B (Modified) Life Plan Community / CCRC
142 IL - 58 AL - 28 MC - 52 SNF - 280 units and beds
MI LARA: Home for the Aged (AL+MC) - Nursing Home (SNF) - CCRC registration

Reporting period	Trailing 12 months ended 2026-08-31
Prepared	2026-09-22
KPI catalog	Operations KPI Catalog v9 (2026-09-22) - 115 measures
In scope for this community	115 of 115 - full continuum plus CCRC entity measures
Staffing model	Staffing Base Calculator rules, driven live off occupancy
Screen grounding	Onboarding Screen Analysis Catalog (2026-09-22)

How to use this workbook

1. Open Inputs	Every shaded cell on the Inputs sheet is editable. Occupancy is the headline driver.
2. Change occupancy	Staffing Model, Financials, the KPI Scorecard and the Action Plan all recalculate.
3. Read Sensitivity	Shows staffing and margin at seven occupancy levels side by side without touching Inputs.
4. Everything else	Reported KPIs come from the uploaded operating reports and do not move with occupancy. Each row on the scorecard says which it is.

MOCKUP - ILLUSTRATIVE OUTPUT. Whitefield Commons is a fictional community and every community-specific value in this workbook is fabricated sample data. The KPI set, benchmark targets and their published sources, the Michigan LARA and CMS regulatory references, the staffing rules and the report structure are all real.

Executive Summary

Whitefield Commons - trailing twelve months ended 2026-08-31. Every required report and manual entry was received. Figures marked model-linked below move with the occupancy set on Inputs; everything else is the reported trailing-twelve-month result.

Campus occupancy	Recommended FTE	Staffing variance	Operating margin	Labour % of revenue	Measures below
91.8%	**173.4**	**-13.9**	**21.5%**	**49.0%**	**18**
of 280 units and beds	at this occupancy	vs current headcount	CCRC benchmark 22.8%	CCRC benchmark 40%	of 115 in scope

What the model says

1

The community is staffed for roughly 80% occupancy and running at 92%.

Current headcount of 159.5 FTE is almost exactly what the model recommends at 80% occupancy. At the occupancy actually being run it is about 15 FTE short, and the shortfall is concentrated in direct care. That is the cleanest explanation available for agency at 9.4% and overtime at 7.2%: the building is carrying 92% census on an 80% staffing plan, and buying the difference at premium rates.

2

Occupancy is the lever, and the model prices it.

The Sensitivity sheet runs the same model from 75% to 100%. Recommended FTE moves about 32 positions across that range while operating margin moves roughly nine points, because fixed campus expense and the occupancy-invariant roles do not follow census. Filling units is worth considerably more than trimming staff.

3

Labour is above benchmark at every occupancy the model runs.

Labour lands near 49% of revenue at recommended staffing and does not reach the 40% CCRC benchmark even at full occupancy. That is a structural consequence of a 52-bed skilled centre inside a 280-unit campus, not a scheduling failure - but agency at 9.4% and overtime at 7.2% are the controllable part of it.

4

Seventeen open positions are the root of four separate findings.

Vacancy 8.9%, time to fill 58 days, agency 9.4%, overtime 7.2%, frontline turnover 58.9%. The same gap drives the CMS staffing domain, the labour percentage, and the direct-care variance in the staffing model.

5

The skilled centre sits at three stars with the fixable domain underperforming.

Health inspection is two stars and lags by survey cycle. Staffing is three. Weekend HPRD at 2.714 against a weekday 3.452 is the single largest recoverable gap, and it needs scheduling rather than hiring.

6

Preventive maintenance is being deferred into capital.

PM completion 81.2% against a 90% standard, 19 days average overdue, on a 1994 campus with average age of plant at 14.8 years. Life safety is clean, so this is economics rather than compliance - for now.

Scorecard rollup - live

Result	Count	Share of scored
On benchmark	22	31.0%
Watch	31	43.7%
Below benchmark	18	25.4%
Informational	8	n/a
CMS-fetched	36	n/a
Total measures in scope	115	

Counts recompute from the scorecard, so the model-linked financial measures move the rollup when occupancy changes.

Inputs - the control panel

Every shaded cell is editable. Nothing else in this workbook is typed in; the rest is formula. Occupancy on row 12 is the headline driver.

Care levels and capacity

	IL	AL	MC	SNF	Note
Care level offered?	Yes	Yes	Yes	Yes	Set to No to drop a level. Scorecard scope follows.
Capacity (units / beds)	142	58	28	52	Licensed or built capacity
Gross square feet	168,000	46,400	19,600	41,600	Drives housekeeping and plant

Occupancy - the driver

	IL	AL	MC	SNF	Note
OCCUPANCY %	92.3%	91.4%	92.9%	90.4%	CHANGE THESE. Everything downstream follows.
Occupied units / census	131	53	26	47	Computed - rounded to whole residents
SNF short-stay share of census	n/a	n/a	n/a	30%	Splits SNF census into rehab and long-term care
SNF short-stay census				14	Computed
SNF long-term-care census				33	Computed

Total capacity	280	Total occupied	257	91.8%	Campus occupancy

Campus structure

CCRC / Life Plan registered?	Yes				Turns on entity measures, security post and foundation role
Ownership model	Standalone				System centralises HR off-site
Tax status	Nonprofit				Drives the foundation / giving role
Campus configuration	Single				Single or Multi-building
Optional security (non-CCRC)	No				Only applies when not CCRC registered
Total employees (headcount)	196				Drives HR ratio and employee dining

Revenue and expense assumptions

	IL	AL	MC	SNF	Note
Rate (IL/AL/MC per month, SNF per day)	$4,150	$7,100	$8,750	$398	Blended achieved rate net of concessions
Non-labour opex per occupied unit (mo) / per patient day	$340	$780	$980	$96	Dining food, supplies, variable utilities
Fixed campus opex (annual)	$3,100,000				Insurance, property, admin, base utilities - does not move with census
Benefit / tax burden on wages	22%				Applied to every wage below

Staffing drivers - direct care

Three-shift ratios (residents per caregiver)	IL	AL	MC	SNF	Note
CNA / aide - day shift	n/a	12	8	8	SBC default AL 12 / MC 8 / SNF 8
CNA / aide - evening shift	n/a	15	8	8	
CNA / aide - night shift	n/a	20	12	12	
Nurse / med aide - day shift	n/a	30	30	20	SBC default AL/MC 30 / SNF 20
Nurse / med aide - evening shift	n/a	30	30	20	
Nurse / med aide - night shift	n/a	30	30	20	
Minimum staff on night shift	n/a	2	2	0	Michigan HFA requires awake staff 24/7. Set 0 to remove the floor.

Staffing drivers - support services

	IL	AL	MC	SNF	Note
Meals per resident per day	1.0	3.0	3.0	3.0	IL 1.0 for a Type B one-meal plan. Set 3.0 for a full plan.
Target meals per labour hour	2.2	2.5	3.0	3.5	Lower MPLH = more labour-intensive service
Housekeeping square feet per FTE	25,000	20,000	8,000	8,000	
Laundry lbs per resident per week	6.4	18.9	18.9	66.0	SNF blended short-stay and long-term care
Laundry processing rate (lbs per hour)	50				SBC constant
Plant ops square feet per FTE	50,000				Grounds are outsourced and excluded

Wages - loaded cost is wage x 2,080 x (1 + burden)

Position	Hourly wage	Loaded / yr			Note
Executive Director / NHA	$62.00	$157,331			BLS OEWS, Grand Rapids-Kentwood MSA
Associate ED	$44.00	$111,654			
Business office	$27.00	$68,515			
Concierge / front desk	$17.00	$43,139			

Sales / marketing	**$34.00**	$86,278			
Program director	**$34.00**	$86,278			
Dining	**$17.20**	$43,647			
Plant operations	**$26.50**	$67,246			
DON / care manager	**$42.00**	$106,579			
Human resources	**$30.00**	$76,128			
Activities / life enrichment	**$19.00**	$48,214			
Social services	**$24.00**	$60,902			
Housekeeping	**$16.40**	$41,617			
Laundry	**$16.00**	$40,602			
Transport	**$18.00**	$45,677			
Security	**$19.50**	$49,483			
Foundation / giving	**$36.00**	$91,354			
CNA / aide	**$21.40**	$54,305			
Nurse / med aide	**$32.80**	$83,233			
Shift supervisor	**$34.00**	$86,278			
MDS coordinator	**$36.00**	$91,354			

Wage medians benchmark to BLS OEWS for the community's MSA. Replace them with the community's own average hourly rate by role from the payroll report for a precise cost read.

Other model constants

Security coverage FTE when staffed	**5.12**				Coverage schedule / 2,080. Gated on CCRC registration or optional security.
Employee meals per employee per day	**0.25**				Drives the employee dining role
Employee dining MPLH	**3.0**				
Hours per FTE per year	**2,080**				
Raw food share of non-labour variable expense	**18%**				Splits out raw food so dining cost per resident day can be scored

Current staffing - from the payroll report

Position	Current FTE				Note
Executive Director / SNF Administrator (NHA)	**1.00**				
Associate ED	**1.00**				
Business office / billing	**3.00**				
Concierge / front desk	**7.00**				
Sales / marketing / admissions	**5.00**				
Program director	**1.00**				
Dining	**30.00**				
Plant operations	**5.00**				
DON / head nurse / care manager	**2.00**				
Human resources	**2.00**				
Activities / life enrichment	**5.40**				
Social services	**2.00**				
Housekeeping	**15.00**				
Laundry	**3.00**				
Transport	**0.80**				
Security	**4.60**				
Foundation / giving	**1.00**				
Dining - employee meals	**2.50**				
CNA / aide	**43.00**				
Nurse / med aide	**19.60**				
Specialty / GCM	**0.00**				
Shift supervisor	**4.20**				
MDS coordinator	**1.40**				
Total current FTE	**159.50**				

Current FTE comes from the payroll / turnover report on Screen 09. The staffing model compares its own recommendation against these figures and prices the gap at the wages above.

Occupancy Sensitivity

The same staffing and financial model run at seven occupancy levels. Row 6 is the only input on this sheet - change any percentage and that column recalculates. Occupancy is applied uniformly to every care level here; the Inputs sheet lets you set each level separately.

Occupancy applied to every care level	75%	80%	85%	90%	95%	98%	100%	Editable
Census at each occupancy								
IL occupied	107	114	121	128	135	139	142	
AL occupied	44	46	49	52	55	57	58	
MC occupied	21	22	24	25	27	27	28	
SNF census	39	42	44	47	49	51	52	
Total residents	**211**	**224**	**238**	**252**	**266**	**274**	**280**	
Recommended staffing (FTE)								
CNA / aide	40.67	42.98	45.45	48.16	50.87	52.36	53.57	Three-shift ratio model
Nurse / med aide	18.55	19.46	20.30	21.35	22.19	22.89	23.24	
Dining	27.35	28.96	30.80	32.62	34.46	35.50	36.27	
Business office	2.33	2.34	2.37	2.03	2.09	2.12	2.14	
Concierge / front desk	4.53	7.41	7.42	7.43	7.44	7.44	7.44	
Activities / life enrichment	5.24	5.41	5.55	5.73	5.87	5.98	6.04	
Social services	1.65	1.76	1.85	1.97	2.08	2.13	2.19	
Laundry	2.24	2.39	2.53	2.69	2.82	2.92	2.98	
Transport	0.64	0.68	0.73	0.77	0.81	0.83	0.85	
MDS coordinator	1.00	1.08	1.12	1.20	1.26	1.30	1.33	
Associate ED	1.00	1.00	1.00	1.00	1.00	1.00	1.00	
Occupancy-invariant roles	44.36	44.36	44.36	44.36	44.36	44.36	44.36	ED, sales, plant, housekeeping, DON, security, foundation, employee dining, shift supervisor
TOTAL recommended FTE	**149.55**	**157.83**	**163.47**	**169.28**	**175.22**	**178.82**	**181.43**	
Current FTE (held constant)	159.50	159.50	159.50	159.50	159.50	159.50	159.50	Today's headcount
Variance to current	+9.95	+1.67	-3.97	-9.78	-15.72	-19.32	-21.93	Negative = understaffed for that occupancy
FTE per occupied unit	0.71	0.70	0.69	0.67	0.66	0.65	0.65	
Financial result at each occupancy								
Revenue	$16,947,930	$18,007,740	$19,112,480	$20,257,490	$21,362,230	$22,022,370	$22,507,240	
Non-labour variable expense	$2,461,920	$2,626,080	$2,776,320	$2,949,840	$3,100,080	$3,205,200	$3,273,600	
Fixed campus expense	$3,100,000	$3,100,000	$3,100,000	$3,100,000	$3,100,000	$3,100,000	$3,100,000	
Labour at recommended staffing	$8,705,093	$9,187,058	$9,515,489	$9,853,679	$10,199,541	$10,408,928	$10,560,723	Recommended FTE at the blended loaded cost per FTE
Net operating income	**$2,680,917**	**$3,094,602**	**$3,720,671**	**$4,353,971**	**$4,962,609**	**$5,308,242**	**$5,572,917**	
Operating margin	**15.8%**	**17.2%**	**19.5%**	**21.5%**	**23.2%**	**24.1%**	**24.8%**	
Labour as % of revenue	51.4%	51.0%	49.8%	48.6%	47.7%	47.3%	46.9%	

Read across: revenue rises faster than cost because fixed campus expense and the occupancy-invariant roles do not move with census. That spread is the entire economic case for filling units, and it is why the margin line steepens as occupancy climbs.

Labour here is priced at the blended loaded cost per recommended FTE from the Staffing Model sheet, rather than position by position, so it will differ by a small amount from the Financials sheet where every role carries its own wage.

Staffing Model

Recommended FTE computed live from the occupancy on the Inputs sheet. Change occupancy there and every figure on this sheet moves. Ratios, meals per labour hour, square feet per FTE and the night-shift floor are all editable on Inputs.

Position	IL	AL	MC	SNF	Campus	Model FTE	Current	Variance	Cost of gap	Driver	Model labour $	Current labour $
Executive Director / SNF Administrator (NHA)	0.00	0.00	0.00	0.00	1.00	1.00	1.00	+0.00	-	Campus ED plus a dedicated NHA unless CCRC consolidation applies	$157,331	$157,331
Associate ED	0.00	0.00	0.00	0.00	1.00	1.00	1.00	+0.00	-	Fires above 200 total census	$111,654	$111,654

Direct care subtotal						**75.80**	**68.20**	**-7.60**	**$478,070**		**$4,916,536**	**$4,456,736**
TOTAL - all positions						**173.36**	**159.50**	**-13.86**	**$919,012**		**$10,091,234**	**$9,354,812**

Model labour is the recommended pattern at the selected occupancy. Current labour holds today's FTE constant at the same wages, so the two diverge as occupancy moves.

Financial Model

A pro forma at the occupancy selected on Inputs. Revenue and variable expense move with census; fixed campus expense does not. Labour is shown twice - at the staffing the model recommends for this occupancy, and at today's headcount held constant.

Revenue

Line	IL	AL	MC	SNF	Total	Basis
Resident revenue	$6,523,800	$4,515,600	$2,730,000	$6,827,690	**$20,597,090**	Occupied x rate. SNF is per patient day.

Operating expense

Line	IL	AL	MC	SNF	Total	Basis
Non-labour variable expense	$534,480	$496,080	$305,760	$1,646,880	**$2,983,200**	Food, supplies, variable utilities - moves with census
Fixed campus expense					**$3,100,000**	Insurance, property, admin, base utilities
Labour - at model staffing					**$10,091,234**	Recommended FTE at this occupancy x loaded wage
Labour - at current staffing					$9,354,812	Today's FTE held constant - shown for comparison

Result

Line				At model staffing	At current staffing	
Total operating expense				**$16,174,434**	$15,438,012	
Net operating income				**$4,422,656**	$5,159,078	
Operating margin				**21.5%**	25.0%	
Labour as % of revenue				**49.0%**	45.4%	
Revenue per occupied unit / month				**$6,679**	$6,679	
Operating expense per occupied unit / month				**$5,245**	$5,006	

Benchmarks: CCRC operating margin 22.8% and labour 40% of revenue (SOSH 2025 / CARF 2024 medians). Revenue and expense per occupied unit benchmark to the SOSH segment tables. The scorecard scores these automatically.

KPI Scorecard - Operations KPI Catalog v9

All 115 measures, scoped to the care levels selected on Inputs. Model-linked rows recompute when you change occupancy. Reported rows come from the uploaded operating reports and hold still. CMS rows are fetched from Care Compare.

Code	Measure	Scope	Value	Basis	Status	Benchmark / target	Benchmark source	Intake screen	Department
Operations (8)

SNF-S7	PBJ Submission and RN Coverage Exceptions	SNF	No exceptions; all quarters submitted	**CMS fetch**	**CMS-fetched**	Automatic 1 star for: failure to submit staffing data by the 45-day deadline; four or more days in the quarter with zero RN hours on days with at least one resident; a failed or unanswered PBJ audit (1 star for three months)	CMS TUG September 2026 scoring exceptions	Tool-fetched from CMS PBJ	Skilled Nursing
SNF-Q1	Long-Stay: Need for Help with Daily Activities Has Increased	SNF	16.9%	**CMS fetch**	**CMS-fetched**	150 points, deciles, 15-point increments. Cut points set on 2023Q4-2024Q3	CMS TUG September 2026 (MDS-based)	Tool-fetched from CMS	Skilled Nursing
SNF-Q2	Long-Stay: Ability to Walk Independently Worsened	SNF	21.4%	**CMS fetch**	**CMS-fetched**	150 points, deciles. Cut points set on 2023Q4-2024Q3	CMS TUG September 2026 (MDS-based, risk-adjusted)	Tool-fetched from CMS	Skilled Nursing
SNF-Q3	Long-Stay: Residents with Pressure Ulcers	SNF	8.9%	**CMS fetch**	**CMS-fetched**	100 points, quintiles (20/40/60/80/100). Cut points set on 2023Q4-2024Q3	CMS TUG September 2026 (MDS-based, risk-adjusted)	Tool-fetched from CMS	Skilled Nursing
SNF-Q4	Long-Stay: Catheter Inserted and Left in Bladder	SNF	1.9%	**CMS fetch**	**CMS-fetched**	100 points, quintiles	CMS TUG September 2026 (MDS-based, risk-adjusted)	Tool-fetched from CMS	Skilled Nursing
SNF-Q5	Long-Stay: Urinary Tract Infection	SNF	3.4%	**CMS fetch**	**CMS-fetched**	100 points, quintiles	CMS TUG September 2026 (MDS-based)	Tool-fetched from CMS	Skilled Nursing
SNF-Q6	Long-Stay: One or More Falls with Major Injury	SNF	3.6%	**CMS fetch**	**CMS-fetched**	100 points, quintiles	CMS TUG September 2026 (MDS-based)	Tool-fetched from CMS	Skilled Nursing
SNF-Q7	Long-Stay: Antipsychotic Medication	SNF	16.1%	**CMS fetch**	**CMS-fetched**	150 points, deciles. Cut points reset to 2024Q4-2025Q3 after the April 2026 schizophrenia-exclusion correction	CMS TUG September 2026	Tool-fetched from CMS	Skilled Nursing
SNF-Q8	Long-Stay: Hospitalizations per 1,000 Resident Days	SNF	1.62 per 1,000	**CMS fetch**	**CMS-fetched**	150 points, deciles. Cut points reset July 2025 when Section GG functional variables were added to risk adjustment	CMS TUG September 2026 (claims-based, risk-adjusted)	Tool-fetched from CMS	Skilled Nursing
SNF-Q9	Long-Stay: Outpatient ED Visits per 1,000 Resident Days	SNF	1.11 per 1,000	**CMS fetch**	**CMS-fetched**	150 points, deciles. Cut points reset July 2025	CMS TUG September 2026 (claims-based, risk-adjusted)	Tool-fetched from CMS	Skilled Nursing
SNF-Q10	Short-Stay: Discharge Function Score	SNF	0.61	**CMS fetch**	**CMS-fetched**	150 points, deciles. Cut points set on 2023Q2-2024Q1	CMS TUG September 2026 (MDS-based, risk-adjusted)	Tool-fetched from CMS	Skilled Nursing
SNF-Q11	Short-Stay: New or Worsened Pressure Ulcers	SNF	2.4%	**CMS fetch**	**CMS-fetched**	100 points, quintiles. Cut points set on 2019Q1-2019Q4. Special rule: because more than 20% of facilities score zero, every facility at zero receives the full 100 points	CMS TUG September 2026 (MDS-based, risk-adjusted; PDC measure code S_038_02)	Tool-fetched from CMS	Skilled Nursing
SNF-Q12	Short-Stay: First-Time Antipsychotic Medication	SNF	1.8%	**CMS fetch**	**CMS-fetched**	100 points, quintiles. Special rule: every facility at zero receives the full 100 points	CMS TUG September 2026 (MDS-based)	Tool-fetched from CMS	Skilled Nursing
SNF-Q13	Short-Stay: Re-Hospitalized After Admission	SNF	22.8%	**CMS fetch**	**CMS-fetched**	150 points, deciles. Cut points reset July 2025	CMS TUG September 2026 (claims-based, risk-adjusted)	Tool-fetched from CMS	Skilled Nursing
SNF-Q14	Short-Stay: Outpatient ED Visit	SNF	11.4%	**CMS fetch**	**CMS-fetched**	150 points, deciles. Cut points reset July 2025	CMS TUG September 2026 (claims-based, risk-adjusted)	Tool-fetched from CMS	Skilled Nursing
SNF-Q15	Short-Stay: Successful Return to Home and Community	SNF	54.6%	**CMS fetch**	**CMS-fetched**	150 points, deciles. Uses a two-year data period; every other QM uses four quarters	CMS TUG September 2026 (claims-based, risk-adjusted)	Tool-fetched from CMS	Skilled Nursing
SNF-Q16	Schizophrenia Coding Audit Status	SNF	No coding anomaly flagged	**CMS fetch**	**CMS-fetched**	Overall and long-stay QM ratings downgraded to 1 star for 6 months, which drops the overall star by one. Short-stay QM suppressed 6 months; the long-stay antipsychotic QM suppressed 12 months	CMS TUG September 2026 QM scoring exception	Tool-fetched from CMS	Skilled Nursing

Basis column: Model-linked rows are computed from the occupancy model on this workbook and change when you change occupancy. Reported rows are the trailing-twelve-month figures from the uploaded operating reports; they describe what happened and do not move with a hypothetical occupancy. CMS fetch rows come from Care Compare on its own refresh cycle.

Model-linked financial measures are stated at the recommended staffing for the selected occupancy, because that is the only internally consistent view once occupancy moves. The Financials sheet shows the same measures at today's headcount alongside.

Department Rollup

Live counts from the scorecard. Change occupancy and the model-linked measures move between bands here too.

Department	Measures	On benchmark	Watch	Below	Informational	CMS-fetched
Operations	**8**	5	3	0	0	0
Sales and Marketing	**11**	1	6	3	1	0
Nursing	**12**	4	5	2	1	0
Finance	**12**	3	5	1	3	0
Human Resources	**11**	0	4	7	0	0
Plant and Maintenance	**10**	4	3	2	1	0
Life Enrichment	**6**	1	2	2	1	0
Dining Services	**9**	4	3	1	1	0
Skilled Nursing	**36**	0	0	0	0	36
TOTAL	**115**	**22**	**31**	**18**	**8**	**36**

Nursing splits across care levels: NUR-01 to NUR-08 apply to assisted living and memory care, NUR-09 to NUR-12 are skilled-nursing MDS and PDPM measures that are not Five-Star contributors. The 36 Skilled Nursing measures are the CMS Five-Star set and are fetched, not entered.

Consolidated Action Plan

Every finding in this workbook on the VMP horizons, in SMART form. KPI codes are stripped by design. Ordered so the work that moves the most measures comes first.

Tactical (30 days)

Tactical	Human Resources Open positions	**Move the 17 open positions to continuous posting with same-week interview scheduling, starting with CNA and the AL med-tech line.**			
	Measurable	Vacancy 8.9% to under 6.0%. Time to fill 58 days to under 50. Agency 9.4% to under 8.0%.			
	Achievable	HR director with the two care-level leaders. No new headcount required.			
	Relevant	This single gap drives the labour percentage, the CMS staffing domain, frontline turnover and the direct-care variance in the staffing model.			
	Time-bound	Postings live and interview blocks calendared within 30 days.			
Tactical	Skilled Nursing Weekend coverage	**Level the weekend nursing pattern against weekday. The hours already exist mid-week.**			
	Measurable	Weekend HPRD 2.714 toward the weekday 3.452, closing the 27% gap.			
	Achievable	DON and scheduler. A scheduling change, not a hiring one.			
	Relevant	Weekend HPRD is a direct CMS Five-Star staffing input and the largest recoverable point gap in the domain.			
	Time-bound	New pattern live within 30 days; PBJ reflects it the following quarter.			
Tactical	Plant and Maintenance Overdue backlog	**Clear every work order more than 30 days overdue and put the preventive-maintenance schedule on a tracked list with an owner per item.**			
	Measurable	Average days overdue 19 to under 14. PM completion 81.2% to above 90%.			
	Achievable	Plant director at 5.0 FTE against a 5.51 model requirement.			
	Relevant	PM completion on a 1994 campus is how deferred maintenance becomes capital expense.			
	Time-bound	Backlog listed within 14 days, aged items cleared within 30.			

Strategic (90 days)

Strategic	Sales and Marketing Funnel and occupancy	**Rebuild the inquiry-to-tour step and work the unpaid referral channel that already converts at 58%.**			
	Measurable	Inquiry-to-tour from IL 23% / AL 24% toward the Aline medians of 28% and 29%. Move-ins per 100 units from 2.4 / 4.1 toward 3 and 5.			
	Achievable	Sales director at 5.0 FTE against a 5.97 model requirement - one open position.			
	Relevant	Occupancy is the highest-value lever in this model: the Sensitivity sheet shows roughly nine points of margin between 75% and 100%.			
	Time-bound	Channel plan set in 30 days, funnel measured at 90.			
Strategic	Dining Services Meal satisfaction	**Seat a resident dining council and run a menu refresh in assisted living and memory care, then re-survey.**			
	Measurable	Meal satisfaction 79.2% toward 85%. Memory care meal participation 64% toward the 60-75% band's upper half.			
	Achievable	Dining director. The model shows dining 3.2 FTE short, not over - this is not a cost-cutting exercise.			
	Relevant	Meal satisfaction is the lowest resident-facing score and the one prospects hear about on tour.			
	Time-bound	Council seated in 30 days, menu changed by 60, re-survey at 90.			
Strategic	Finance Budget on the model	**Build the FY27 budget off the staffing model at the planned occupancy rather than off prior-year actuals.**			
	Measurable	Labour toward 45% of revenue at planned occupancy. Operating margin toward the 22.8% CCRC benchmark.			
	Achievable	CFO with the department heads. The model is the input.			
	Relevant	Budgeting from last year's actuals bakes in the current vacancy and agency pattern as if it were normal.			
	Time-bound	Budget built by the 90-day mark for board adoption.			
Strategic	Nursing Acuity and rate	**Reconcile the assisted-living acuity migration to the care-tier rate schedule and the staffing ratios.**			
	Measurable	Tier 3+ mix rose 6 points year over year with no rate or staffing response. Close that gap.			
	Achievable	DON and business office. The rate schedule already has five tiers.			
	Relevant	Rising acuity without a rate response is revenue left on the table and a staffing risk at the same time.			
	Time-bound	Reassessment sweep complete and repriced within 90 days.			

Horizon (6-12 months)

Horizon	Life Enrichment Evening and weekend programming	**Extend evening and weekend programming, prioritising memory care where structured engagement is measurably short.**			
	Measurable	Participation 78.9% above 80%. Evening coverage from 2 of 7 nights. Memory care weekend from 1.5 hours per day.			
	Achievable	Life enrichment director at 5.4 FTE against a 5.75 model requirement.			
	Relevant	Thin weekend memory-care programming is both a quality finding and a survey exposure in a secured unit.			
	Time-bound	Calendar rebuilt within 6 months, measured over the following two quarters.			
Horizon	Technology Close the measurement gaps	**Put dining, maintenance and resident engagement on systems that produce reports, and activate the scheduling module already licensed.**			
	Measurable	Six measures move from hand-compiled to system-reported, including PM completion, food cost and technology engagement.			
	Achievable	Plant, dining and HR directors. Scheduling carries no incremental licence cost.			
	Relevant	The measures with the widest error bars in this scorecard are the ones no system produces.			
	Time-bound	Scheduling activated in 90 days; dining and CMMS live within 12 months.			
Horizon	Finance Capital and the 2028 call	**Build a multi-year capital renewal plan and position for the 2028 optional call on the Series 2018 bonds.**			
	Measurable	Average age of plant 14.8 years held or improved. Refunding analysis complete with covenant headroom verified.			
	Achievable	CFO, plant director and bond counsel.			
	Relevant	Days cash at 168 clears the 120 covenant but sits below the 180 standard. Liquidity has to be established before the call window.			
	Time-bound	Capital plan adopted within 12 months; refunding analysis six months before the call.			

Sequencing note: the recruiting sprint and the weekend scheduling change are first because between them they move the labour percentage, the CMS staffing domain, frontline turnover, the direct-care variance and the operating margin. Nothing else in this plan moves five measures at once.

Benchmark Sources

Copied from the Benchmark Source Map in Operations KPI Catalog v9. Every target scored in this workbook traces to one of these published sources.

Source	Applies To	Supplies	Vintage / Note	Match Key	Alt Match Key	KPIs Mapped	KPI Codes	Where the Data Is Found (Gap Matrix v9)

No URL exists - advisor material, not published. Not documented at table or page level in either workbook, so these targets cannot be externally verified by a third party.
Aline Sales and Marketing Benchmark Report	IL, AL, MC, Life Plan Residential	Inquiries, tours and move-ins per 100 units per month; inquiry-to-tour and tour-to-move-in conversion; inquiry channel mix; conversion by channel	Q1 2024 edition as held. The 2026 Senior Living Sales and Marketing Benchmark Report is the current publication but is registration-gated and its figures could not be obtained, so the catalog cites Q1 2024 to match its own numbers.	Aline	Aline Benchmark	7	SAL-01, SAL-02, SAL-03, SAL-04, SAL-05, SAL-06, SAL-07	'Benchmark Sources' row 15 (name A15, link I15). Link: https://alineops.com/senior-living-sales-marketing-benchmark-report-2026/ - verified 22 Sep 2026. EDITION MISMATCH: the matrix holds the 2026 Senior Living Sales & Marketing Benchmark Report, not the Q1 2024 edition recorded in column D of this row. Not recorded at table or
Siemens / Brightly Senior Living Maintenance Benchmarks	All care levels, campus wide	Work orders per resident unit, on-time completion, labor hours per resident unit, average days overdue, average days open, resident billings per resident unit	Drawn from 1,000+ senior living organizations. Entire Plant block except Average Age of Plant and Energy Use Intensity.	Brightly	Siemens	7	PLT-01, PLT-02, PLT-03, PLT-04, PLT-05, PLT-06, PLT-07	Gap Matrix v9: 'Benchmark Sources' row 9 (name A9, basis H9, link I9). Link: https://www.assetmanagement.siemens.com/use-cases/senior-living - verified 22 Sep 2026. 2026 edition, (c) Brightly Software Inc 2026, 1,000+ senior living organisations. Locations: KPI #2 on-time (76%), KPI #4 overdue severity (3.4 days avg; PM 5.6, ad hoc 2.4). NAMING: the matrix records this source as Siemens throughout (Brightly was acquired by Siemens).
CLA 40th Annual SNF Report	SNF, financial only	SNF payer mix, revenue and expense per patient day	Approximately 11,700 CMS cost reports. Used for SNF financial comparison, which sits in Finance, not in the SNF Five-Star block.	CLA 40th	CLA	3	FIN-03, FIN-04, FIN-06	'Benchmark Sources' row 13 (name A13, link I13). Link: https://www.claconnect.com/en/resources/white-papers/snf-cost-comparison-industry-trends-report - verified 22 Sep 2026. 40th edition, 2025 release on FY2024 data. Locations: skilled revenue per patient day by payer; payer mix derived from approximately 11,700

EPA ENERGY STAR Portfolio Manager	All care levels	Energy Use Intensity for senior care communities	Senior Care Communities DataTrends. Median site EUI approximately 214 kBtu per square foot.	ENERGY STAR	Portfolio Manager	1	PLT-10	NOT HELD - DO NOT WRITE A LINK. The Gap Matrix v9 workbook has no row, no link and no KPI citing ENERGY STAR. Its utility benchmark comes from SOSH 2025 Tables 3.22-3.24 instead. PLT-10 in this catalog is therefore the only place ENERGY STAR is used across the two workbooks and must be sourced independently.
Kushant Shah - internal standard	IL, AL, MC, SNF	A/R aged over 90 days, bad debt and write-off rate, food waste rate, deposit-to-move-in conversion (joint with Rob Clark)	No published edition or date - advisor internal standard, no external benchmark exists. Added 22 Sep 2026 with the Gap Matrix v9 measures.	Kushant Shah	KS internal	4	SAL-10, FIN-11, FIN-12, DIN-09	Gap Matrix v9: no dedicated 'Benchmark Sources' row - recorded there as 'Internal standard (Kushant Shah)' on the KPI rows themselves. No URL exists; advisor material, not published.
Other named sources - RETIRED 22 Sep 2026, should read zero	Varies	Emptied by owner instruction: third-party named sources are no longer carried in the Benchmark Source column. Benchmarks that lost their attribution were re-recorded as Rob Clark internal standards; CMS and state regulatory citations were folded into the CMS and regulatory row above rather than re-attributed, because a regulatory requirement is not an advisor standard.	If this count is ever above zero, a new unapproved source has entered the catalog - investigate rather than add a row.	(no key - catch-all)	(no key - catch-all)	0		Not applicable - no source. This row is a control check, not a source.
How these counts are built								
Counts and codes are formulas over the Benchmark Source column on the KPI Catalog tab, matched on the Match Key and Alt Match Key in columns E and F. Edit a key and the count and code list update. Nothing is typed in.								
Other named sources' is the exclusive remainder - KPIs matching none of the nine keys - taken from the Primary Benchmark Source Group helper in column Q of the KPI Catalog. Matching elsewhere is non-exclusive, so a KPI citing two sources is counted under both.								
Sum of rows 5-13 (with overlap):			125					

Distinct KPIs in the catalog:			115					
Dual-source KPIs (the difference):			10					
Source discrepancies raised by the Gap Matrix v9 workbook (22 Sep 2026)								
CMS Five-Star Technical Users' Guide edition - DECIDED 22 Sep 2026: this catalog keeps September 2026. The Gap Matrix holds April 2026 on some SNF rows and July 2026 on others and is internally inconsistent by its own account; ours is the later edition and stands. The 36 SNF measures and their QM cut-points remain on the September 2026 basis. If the Gap Matrix re-bases to September 2026 the two will align; until then expect its SNF cut-points to differ from ours.								
Aline edition - CLOSED 22 Sep 2026: the catalog stays on the Q1 2024 edition, which is the vintage the SAL-01 to SAL-07 target figures actually come from. The 2026 report is the newer publication but is registration-gated and neither workbook can obtain its figures, so citing 2026 would put a label on numbers that did not come from it. Citing the edition we hold is the defensible position. Yellow flags on the target cells have been cleared - the source and the figures now agree. Revisit only if someone with Aline report access supplies the 2026 values.								

Siemens / Brightly naming: the Gap Matrix records this source as Siemens throughout, since Siemens acquired Brightly, and asks that the catalog do the same. The seven Plant rows here cite Brightly. The match keys in columns E and F accept both spellings, so counts are unaffected either way - renaming the citations is a one-line change on request.								
EPA ENERGY STAR Portfolio Manager: not held by the Gap Matrix at all. PLT-10 is the only measure across both workbooks using it, and the matrix benchmarks utilities from SOSH 2025 instead. PLT-10's 214 kBtu target needs an independent source or should move to SOSH.								
Alzheimer's Association attribution - CLOSED 22 Sep 2026 by deletion. The former LE-03 memory care structured engagement hours cited the Alzheimer's Association for 4-6 hours per resident per day with no title, year or page, and no link existed in either workbook. The Gap Matrix recorded the same measure as 4-6 hours per WEEK on a Rob Clark internal standard and noted that the Alzheimer's Association publishes dementia care practice recommendations, not an hours-per-resident benchmark. Rather than carry an unsourceable 7x ambiguity, the owner deleted the measure on 22 Sep 2026 and the LE codes were renumbered. The Alzheimer's Association is no longer cited anywhere in this catalog. The remaining life enrichment coverage expectation is LE-06, attributed to Rob Clark.								

Sources held by the Gap Matrix v9 workbook but not cited in this catalog								
Third-party named sources removed from the catalog - 22 Sep 2026, owner instruction								
The Benchmark Source column no longer names any third-party organisation outside the approved list. Eleven rows kept a valid source and simply had the extra names trimmed: OPS-05, OPS-06, SAL-09, FIN-06, HR-01, HR-02, HR-05, HR-08, PLT-07, DIN-04, DIN-05. Eleven rows were left with no source and are now Rob Clark internal standards: OPS-02, OPS-07, NUR-02, HR-03, HR-04, HR-06, HR-07, LE-01, LE-02, LE-05, DIN-03. Removed names included NIC MAP, LeadingAge, Argentum, ICAA, Activated Insights, ANFP, Holleran, J.D. Power, Caring.com, Senior Housing News, Pinnacle Quality Insight, HCS Annual Report 2024 and unattributed 'industry practice'. Every original attribution is preserved verbatim in that row's Boundary and Notes column - nothing was silently discarded.								
EXCEPTION applied deliberately: CMS and state regulatory citations were NOT re-attributed to Rob Clark. 42 CFR, F-tags, the RAI Manual, the Life Safety Code, MDS Section K and state regulation are legal requirements, not advisor benchmarks, and re-labelling them would have destroyed survey-relevant traceability on 13 measures (OPS-08, NUR-04, NUR-06 to NUR-12, PLT-08, DIN-05, DIN-06, DIN-07). They were folded into the CMS and regulatory row instead, which is why its count rose from 36 to 50. Raise this if the intent was to strip them too.								

Creating Results - https://creatingresults.com/marketing-research-strategy/ (verified 22 Sep 2026)								
State health department / fire marshal inspections - no single national link, varies by state								
Rob Clark CDS Best Practice Metrics 2025 (inflation-adjusted) - advisor material, no public link. This is the source of the 0-4% productive-hours overtime band.								
Rob Clark internal standard, and Kushant Shah internal standard - no external publication, no link.								

Data vintage: Aline figures are Q1 2024. CARF figures are 2024 medians from the 2025 edition. SOSH figures are 2025. CMS cut-points are the September 2026 Five-Star Technical Users Guide.

Method, Scope and Caveats

What drives what

The single driver	Occupancy on the Inputs sheet. Changing it re-runs the staffing model, the financial model, the model-linked measures on the scorecard and every live count on the summary and rollup sheets.
Occupancy-elastic staffing	Direct care, dining, laundry, activities, social services, business office, concierge, transport, MDS and the associate ED all scale with census.
Occupancy-invariant staffing	Executive director, sales, plant operations, housekeeping, the care director, security, foundation, employee dining and the SNF shift supervisor do not. Sales is driven by capacity because it is sized to build census, and housekeeping and plant are square-foot driven.
Why margin steepens	Fixed campus expense and the invariant roles do not follow census, so each additional occupied unit carries a much higher contribution margin than the average unit. That spread is the whole economic case for filling units.
Labour in the model	Priced position by position at the wages on Inputs, loaded with the benefit and tax burden. The Sensitivity sheet uses a blended cost per FTE instead, so its labour line differs slightly from the Financials sheet by design.

Scope and filtering

KPI set	Operations KPI Catalog v9, 2026-09-22. 115 measures. The care-level applicability columns in that workbook decide what is in scope; a full CCRC continuum scores all 115.
A note on the count	The v9 title reads 108 measures and the Care Level Filter sheet totals 108 for a CCRC. Appendix B of the Screen Analysis Catalog records that those counts predate the eight additions made on 22 September, so 115 is current. This workbook scopes by the applicability columns, not the filter table.
Staffing boundary	Per the SBC Boundary sheet in v9, no KPI duplicates a staffing model output. FTE per occupied unit, AL and MC hours per patient day, meals per labour hour, housekeeping square feet per FTE and laundry pounds per hour are model outputs and are deliberately absent from the scorecard. The three CMS hours-per-resident-day measures are the documented exception and stay in the SNF block because they are rating inputs.
Screen grounding	Every measure traces to an onboarding screen through the Screen Analysis Catalog. 71 are scored from screens, 36 are fetched from CMS, and 8 were not yet assigned to a screen when that catalog was written.

Caveats

MOCKUP	Whitefield Commons is fictional. Every community-specific value here is fabricated sample data. The KPI set, the benchmark targets and their sources, the Michigan LARA and CMS regulatory references, the staffing rules and the structure are real.
Reported measures do not move	About 70 measures are trailing-twelve-month results from the uploaded reports. They describe what happened at the occupancy the community actually ran. When you raise occupancy on Inputs they hold still, because a hypothetical census cannot restate a historical result. Only the model-linked rows follow.
Model-linked financials	Stated at recommended staffing rather than today's headcount, because current FTE is a fixed historical fact that stops being meaningful at a different occupancy. The Financials sheet shows both side by side.
Rounding	Occupied units are rounded to whole residents at each level, so total census can move by a unit or two between adjacent occupancy scenarios.
Wages	BLS OEWS medians for the Grand Rapids-Kentwood MSA. Replace them with the community's own average hourly rate by role from the payroll report for a precise cost read.
Raw food share	Dining cost per resident day splits raw food out of non-labour variable expense at the share set on Inputs. Replace it with the actual food line from the general ledger when available.
Not modelled	Policy and procedure alignment, contract analysis, document review, market radius, cultural health and the technology gap are analyses rather than KPIs. They are deliberately outside this workbook and outside the v9 catalog.
